

Sanders County Rural Addressing Application Process

1. Complete a 9-1-1 Rural Addressing Application and return it with \$25.00 to the Rural Addressing office.
2. Once the application and fee are received, you will be issued a “proposed” address which you may use temporarily to acquire utilities, etc.
3. I will visit your property during routine field work and record the location of your driveway and new structure using GPS equipment.
4. That data will then be processed and you will receive an “Official Address Notification” in the mail.

Though I make every effort to issue an accurate “proposed” address, there is the possibility that it *may change*, so it is suggested that you not invest in signs, stationary, etc. until you receive official address notification.
