Distance x price= \$ _____ your cost

Check or money order made payable to "Sanders County."

You have also attached an accompanying map

2022 SANDERS COUNTY DUST CONTROL PROGRAM

Sanders County will be accepting applications for dust control using magnesium chloride, only on county maintained gravel roads. Magnesium Chloride is a temporary product that is not guaranteed to completely suppress dust.

The proposed dust control for a location must be a minimum of 300 feet in length. The application must be accompanied by a map of the location as well as full payment by either a check or money order made payable to " *Sanders County.*"

Dust control applications may be denied or delayed due to pending road improvements or annexations, weather, road conditions and/ or the availability of the Road Department or the Applicator to participate. After dust suppressant is applied, the County will continue to maintain the road as needed. The County will only participate in dust control application once per section of road per year.

If you have any questions please contact the road foreman for your district. Road District No. 1 & 2 Ben Bache at 406-531-1711 and Road District No. 3 Lee Smith 406-827-3691. County road crews will mark, prep and water the sites the day before treatment is applied.

To obtain an application you can visit the County website at <https://co.sanders.mt.us/departments/road-department/> or contact Jennifer Mihan at 406-827-6966.
